Subject: Irradiation and Antibiotics
Auto forwarded by a Rule

Ms. Henney,

Although irradiation of meats can prevent a considerable amount of deadly bacteria from being passed on, the public has a right to NOT purchase products that have been irradiated. Please make sure that labels on irradiated foods are clear and prominent to allow us to make that choice.

Also, as a member of CSPI, I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections to humans. That is why I support the petition filed by CSPI. Thank you for your time.

Sincerely,
Catherine Stanski
